

# Qreeting User Manual

---

## 1. Overview

Qreeting is a cross-platform mobile application for securely uploading, managing, previewing, and sharing files. It offers folder-based browsing, recent items, QR and link sharing, optional file protection via security questions, subscriptions, profile management, dark mode, and multi-language support.

Key Features:

- Upload files with optional protection (security question + answer).
- Preview PDFs, images, videos, text; open Office files via Google Docs viewer.
- Long-press file actions: Download, Delete, and Share (QR/link).
- Browse by folders (Audio, Video, Photo, Documents) and view Recent files.
- Profile management, language selection, and dark/light theme.
- Subscription plans with in-app purchases (Android Play Billing).

## 2. Getting Started

Onboarding & Sign-in:

- First launch shows onboarding. Tap Skip or Done to continue.
- Sign In or Sign Up. Forgot Password and OTP flows are supported.
- If no subscription is active, users are redirected to the Subscribe page.

## 3. Home

- Header: profile access and night mode toggle.
- Folders: Audio, Video, Photo, Documents — tap to browse.
- Recent Files: tap any item to preview.
- Bottom Bar: Home, Plus (Upload), Profile.

## 4. Uploading Files

- Tap the Plus button (+) to open the upload modal.
- Select a file from device storage (all common types supported).
- Optional: choose a security question and enter an answer to protect the file.
- Tap Upload. A success message confirms completion.

Protect a File (Optional):

1. Tap + → Select File.
2. Pick a Security Question.
3. Enter the Answer (passkey).
4. Tap Upload to save with protection.

## 5. Browsing Files

- Open a folder to list files with icons, size, date, and counters.
- Tap a file to preview; long-press for actions.

## 6. File Actions (Long Press)

- Download: saves to device (on Android via Media Store).
- Delete: confirms, then permanently removes the file.
- Share: opens QR and link sharing modal for the file's download URL.

## 7. File Preview

- PDF: in-app PDF viewer (pagination, links).
- Office docs: opened via Google Docs viewer.
- Text files: displayed in a web view.
- Zip: preview not available (download instead).
- Close the preview via the Close button.

## 8. Sharing via QR or Link

- Generate a QR code for a secure download link and share as an image.
- Share or copy the link for messaging or email.

## 9. Profile

- Edit name, change password, and update profile picture.
- Open Privacy Policy and leave app feedback in the store.
- Logout to end the session.

## 10. Subscriptions

- Toggle Monthly/Yearly to see plan prices and features.
- Select a plan and tap Buy Plan to purchase via the store.
- Purchases are validated server-side; success returns to Home.

## 11. Internationalization & Theme

- Languages: English, Arabic, German, Spanish, French, Hebrew, Italian.
- Toggle dark/light mode from the header.

## 12. Permissions

- Storage/Photos: downloading files and updating profile picture.
- File Access: selecting files to upload.

### **13. Troubleshooting**

- Upload fails: ensure a file is selected and internet is available.
- Preview unavailable: some formats (e.g., zip) cannot preview; download instead.
- Download issues: check storage permission and free space.
- Subscription 'already owned': allow validation to complete or restart the app.

### **14. Privacy & Security**

- Optional protection with security question and answer (passkey).
- Shared links and QR codes respect subscription limits and backend security rules.
